GL32 is a high-performance level, with an error of less than 1.5mm per kilometer. 32x magnification brings with clear vision. The precise compensator guarantees the accurate measurement results.

Specifications

1Km Error	<2.0mm		Focusing Error	<1.0mm
Magnification	32		Compensator	Magneticdamper
Objective aperture	42mm		Working Range	>±15
Resolution	<3.5"		Compensating error	<0.5
Angle of View	1°20		Setting Accuracy	<0.5"
Image	Erect		Setting Time	<2s
Reticle	Cross reticle		Bubble	10'/2mm
Min view Distance	<0.3m		Scale	1°or 1gon
View Distance Error	<±0.4%
